Summary

Computer Science undergraduate at the American International University–Bangladesh (AIUB) with hands-on experience in full-stack software engineering through industry and personal projects. Currently working as a Software Engineering Intern at AuraDev, contributing to the development of production-grade web applications. Passionate about building scalable software systems, with research interests in Machine Learning, Natural Language Processing, and Large Language Models.

Skills

- **Programming Languages:** C/C++, Java, C#, Python, JavaScript, TypeScript, Kotlin
- **Frontend:** HTML, CSS, Tailwind CSS, React.js, Next.js
- **Backend:** PHP, NestJS, FastAPI
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, Docker, Postman, Linux, Android Studio, Firebase

Experience

AuraDev LTD | Software Engineering Intern June 2026 - Present

- Contributing to **GrantOS** as part of a professional agile engineering team, involved in end-to-end product development across the full stack.
- Developing and integrating backend REST APIs, handling business logic, and connecting services to the frontend application.
- Building and refining client-facing frontend features using modern web technologies in a real-world product environment.
- **Technologies:** TypeScript, React, NextJS, FastAPI, PostgreSQL, Prisma

Projects

MessMasterApp_Backend | Backend Developer GitHub

- Developed a scalable RESTful backend for a smart mess management system using NestJS and PostgreSQL.
- Designed role-based authentication and authorization with JWT (Access & Refresh Tokens), enabling secure manager and member workflows.
- Built modular APIs for mess management, meal tracking, utility expenses, notices, and member management using TypeORM and DTO validation.
- Designed a relational PostgreSQL database with normalized entities to support meal records, shared expenses, utility bills, and announcements.
- **Technologies:** TypeScript, NestJS, PostgreSQL, TypeORM, JWT, Passport.js

MessMasterApp | Android Developer GitHub

- Developed a native Android application that streamlines meal tracking, expense management, utility billing, and communication for shared living environments.
- Implemented role-specific interfaces for managers and members with secure authentication and seamless integration with RESTful APIs.
- Built responsive Material Design interfaces using Kotlin and XML, featuring dashboards, meal management, utility tracking, notices, and profile management.
- Integrated real-time data synchronization with the backend to automate meal-rate calculation and monthly bill generation.
- **Technologies:** Kotlin, XML, Android SDK, Material Design, REST API

- Developed a full-stack AI-powered chat application featuring real-time conversational interfaces with streaming AI responses and a modern chat experience.
- Built a responsive frontend using Next.js, React, and Tailwind CSS, integrating AI APIs through secure RESTful endpoints.
- Implemented reusable components, custom hooks, streaming responses, and robust error handling to deliver a scalable and maintainable architecture.
- **Technologies:** TypeScript, React, Next.js, Tailwind CSS, AI SDK, REST API

Publications & Research

Accepted Publication

- **Al Amin Hossain Nahid**, Ferdus Hossain, Tariful Islam Fahim, and Salman Zzoha. “Intelligent Waste Classification for Sustainable Urban Development: A MobileNetV3-Based Deep Learning Approach Using the BDWaste Dataset.” To appear in *Proceedings of the International Conference on Power, Electronics, Communications, Computing, and Intelligent Infrastructure (PECCII 2026)*, 2026.

Ongoing Research

- **Al Amin Hossain Nahid**, Chowdhury Shakil Hasan, Rakibul Islam Akash, Abdullah Al Rafe Ayon. “An AI-Based Legal Advisory System for Traffic Violation Verification Using Official Traffic Regulations.” Manuscript in preparation.

Education

American International University-Bangladesh
B.Sc. in Computer Science and Engineering

Sept 2022 – Present
CGPA: 3.64/4.00
